

GIRA

Smart Home.
Smart Building.
Smart Life.

partner.gira.com

The world's radio stations
in your wall.
Gira IP flush-mounted radio.

Gira / Design & function

We are Gira.
We are the ones with the switches.
But we're so much more.

Future-oriented.
Certified.
Responsible.

We're the guardians, innovators,
Smart Home pioneers, developers,
system experts, KNX partners,
shapers of the future, patent masters,
award winners and designers.

But above all, we are the ones
who listen.
To you.

Subtle, but smart.
With a distinct focus on quality,
materials and functions.
And the driving force of innovation.

In our hearts, we are engineers
on a mission to inspire.
With new technologies,
smart applications and
impressive attention to detail.

We will always work our hardest
to find the best solution for you.
With service, design and performance
made in Germany.

Because that is what we stand for.
And have been standing for since 1905.

Convenience never sounded so good.

Brilliant sound and convenience with many possible uses: the Gira IP flush-mounted radio is much more than an internet radio. In the bedroom, it can be used as an alarm clock. In the kitchen, bathroom or on the bedside table, the flush-mounted device keeps surfaces free. Regardless of the room, it can be switched on automatically with a light switch or presence detector when someone enters. Its sound quality is impressive wherever it is used. It can receive internet radio stations from all over the world – and personal playlists from a smartphone or tablet via Bluetooth.

⊕ Highlights, facts and benefits of the Gira IP flush-mounted radio:

Internet connection via WPS at the touch of a button or using the Gira System 3000 App.

Convenient operation possible using the Gira System 3000 App.

Can be used as a radio, Bluetooth speaker or Sonos operating point.

WLAN ensures good reception.

Daily weather forecast in the display.

Alarm function.

Suitable for all Gira System 55 and Gira F100 designs.

Test the variety of functions interactively on our website:

link.gira.de/radiogb

Small radio, big range of functions.

Convenient operation by app possible.

With the Gira System 3000 App, the Gira IP flush-mounted radio can be easily configured and operated from the comfort of your sofa by Bluetooth: You can tune in to internet stations and adjust the volume, set up the alarm function and weather forecast, and play music from your smartphone or tablet. You can also sort your favourites list and adjust the basic settings, including the content and appearance of the display.

Global internet radio.

The radio can receive almost all the radio stations available on the internet worldwide. Most of these are displayed in the Gira System 3000 App and others can be added individually using their URL.

Bluetooth speaker.

The Gira IP flush-mounted radio is not only an internet radio, as it can also be used as a Bluetooth speaker. For playing music, podcasts or other audio formats from a smartphone or tablet.

Sonos operating device.

The Gira System 3000 App can be used to switch between the “IP radio” and “Sonos operating point” functions as desired.

SONOS

Excellent WLAN reception.

Unlike a regular radio signal (FM, DAB+), the WLAN signal can be amplified as the user requires, for example using repeaters – meaning that the Gira IP flush-mounted radio always has the best reception.

230 V/AC auxiliary input.

The integrated 230 V / AC auxiliary input enables the radio and lighting to be switched on and off simultaneously in the bathroom, for example. Particularly convenient if the light is controlled by a motion detector.

Weather forecast.

The Gira IP flush-mounted radio provides a weather forecast for the current day: The display can show the average temperature, cloud cover and probability of rain for the next few hours.

Design as you wish.

The Gira IP flush-mounted radio is available to suit the many colours and styles of the Gira System 55 and Gira F100 design lines, allowing it to blend seamlessly into the surrounding interior design.

Easy start-up.

Connecting to the internet is easy to do at the touch of a button via WPS or using the Gira System 3000 App. The 20 stations most frequently selected locally are automatically saved to the favourites list. The first three can be switched on using the short-cut buttons, and the others using the skip button.

Technical data

Rated voltage	AC 230 V, 50 Hz
Speaker impedance	4 Ω to 16 Ω
Connection terminals	
Network	1.5 mm ² to 2.5 mm ²
Speaker	0.5 mm ² to 1.5 mm ²
Installation depth	32 mm
Audio output	1.5 W (8 Ω), 3 W (4 Ω)
Ambient temperature	-5 °C to +45 °C
Bluetooth	
Wireless frequency	2.402 GHz to 2.480 GHz
Transmission power	max. 2.5 mW
Transmission range	typ. 10 m

Gira Academy. So that everything goes to plan.

We offer you specialist support for all new technical features and for the whole range of Gira products. In the Gira Academy, you will find various types of seminars and training courses – both online and in person. Select the training offer that suits you best, from traditional electronics to modern Smart Home topics.

Online seminars.

These are held with a direct contact person in a virtual space. Questions can be answered right away in discussions with other participants.

Web-based training courses.

Use our web-based training courses for independent learning when it's convenient for you – on a smartphone or tablet even when on the move. Find out how to integrate the Gira IP flush-mounted radio into the network or how to control it using the Gira System 3000 App, for example, in the Gira System 3000 web-based training course.

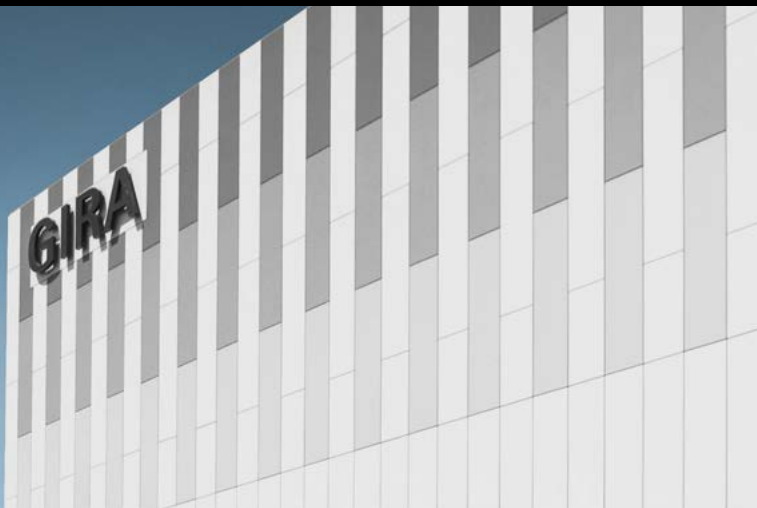

You can find the Gira System 3000 web-based training course at link.gira.de/wbradiogb

Being innovative means thinking beyond your own four walls.

Since 1905, we've been the ones with the switches, but we're so much more ... Because innovation is our great passion. Our pioneering spirit drives us to constantly improve and enhance the comfort of people's homes with innovative solutions.

"Made by Diversity".

Gira has been manufacturing products at its location in Radevormwald for more than 100 years. The company is fully committed to the "Made in Germany" quality standard. This is what 1,250 employees from 27 nations work for – each and every one of them with different talents, individual expertise, wide-ranging experiences and different life stories. This diversity – supported by shared values – provides the basis for our creativity, innovative strength and future viability.

Innovative technology,
award-winning design.

We have always aspired to combine maximum functionality and reliability with a unique design to create special user experiences. The extraordinary design quality and functionality of our products have been recognised by many internationally acclaimed awards.
